

Skills Workshops: Abortion/Papaya Training

Note to all participants and student leaders: these workshops are not intended to replace formal skills training and do not suffice for “competency”. They are intended to introduce students to these skills, and build their understanding of steps involved.

Papaya Workshop Resources:

- [Overview of Papaya Workshop](#)
 - [Papaya Workshop Learner Guide](#)
 - [Papaya Workshop Facilitator Guide](#)
- [MM-IT Papaya Workshop Activity](#)
- [Papaya Workshop Teaching Resources](#)
- [Training in MVA using papayas](#)
- [TEACH Early Abortion Training Workbook](#)
- [Steps for performing manual vacuum aspiration](#)
- [IpasUniversity](#): Uterine evacuation and MVA follow-up courses

Alternative workshops:

- Medication Abortion
 - [Early Options Medication Abortion](#)
 - [IpasUniversity](#): Misoprostol and Mifepristone courses
- [Pain Management with MVA](#)
- Endometrial biopsy: [procedure module](#)
- Miscarriage Management
 - [Ipas US Start-up kit for integrating manual vacuum aspiration for early pregnancy loss into women’s reproductive health-care services](#)
 - Forthcoming EPL modules

Workshop Leaders: Ideally, you will find a faculty member or clinician who can lead this workshop. Please contact NSFC to assist you in finding a workshop facilitator in your area.

Supplies:

- Utilize supplies from Paragard/IUD workshop for Papaya workshop
- Contact Ryan or Family Planning Fellowship program at your school for supplies and leaders
